DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Claim 1 drawn to a reflective liquid crystal device comprising any one layer of the light blocking metal films covering the openings formed between adjacent ones of the reflective pixel electrodes, the light blocking metal films in each layer being electrically isolated from one another pixel by pixel, each light blocking metal film in each layer being electrically connected, through via holes, to each corresponding one of the switching elements, reflective pixel electrodes and storage capacitors.

II. Claims 4 and 5 drawn to a reflective liquid crystal device comprising the insulating film laid between the two layers of the light blocking metal films being a light blocking insulating film whose thickness is set to be equal to or thinner than 400 nm or made of a material selected from the group consisting of SiN (SiN_x???) and SiON (SiO_yN_z???).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a

listing of all claims and any drawings readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOAN C. NGUYEN whose telephone number is (571) 272-2296. The examiner can normally be reached on MONDAY-THURSDAY:8:00AM-4:30PM.
